Ayesha Areej

AI Automation & Software Engineer

Islamabad, Pakistan | ayeshaareej59@gmail.com | linkedin.com/in/ayesha-areej-b44834232 | github.com/AyeshaAreej

SUMMARY

Software Engineer specializing in application development and AI-driven workflow automations. I architect scalable applications and intelligent pipelines that eliminate manual effort to drive efficiency. Passionate about shipping robust products that create tangible business impact.

PROFESSIONAL EXPERIENCE

Software Engineer, Enumsol, Islamabad, PK — Feb 2023 – Present

- Contribute to the core frontend development of corporate website ensuring responsive UX.
- Implemented complete architecture of a complex Norway Research Project.
- Developed high-performance Food Delivery Mobile App using React Native and Tailwind CSS.
- Architected workflow automations utilizing n8n, Zapier, Make, and Flowise.

Team Lead (Summer Intern), Pak Thai Digital Innovation Lab, SEECS, NUST — Jul 2026 – Sep 2026

- Served as Team Lead, overseeing task allocation, guiding team members, and coordinating completion of assigned work.
- Implemented the TailorConnect app using Flutter, Node.js, and MongoDB.
- Managed the project from documentation to deployment, including testing, identifying gaps, and meeting requirements.

Software Engineer, Alta Tech Mark — May 2023 – Aug 2023

- Developed IoT-connected mobile application for plant management with automated watering.
- Engineered thermal image social media application for specialized image sharing.

Full-stack Developer (Intern), MayaLogic — Oct 2022 – Jan 2023

- Developed tailored ERP system for Sun Tech streamlining inventory, finance, and HR.
- Built job hunting platform utilizing MERN stack and Tailwind CSS.

EDUCATION

M.S. Computer Science, NUST

B.S. Software Engineering, Sukkur IBA University

SKILLS

Frontend: React, Next.js, Vue.js, Nuxt, TypeScript, JavaScript, Tailwind, Bootstrap, MUI, shadcn, lovable.dev

Backend & Mobile: Node.js, Express, FastAPI, Strapi, Prisma, React Native, Expo

AI & Automation: n8n, Make, Zapier, Flowise, OpenAI

Databases & Cloud: MongoDB, MySQL, Redis, Supabase, Firebase, AWS EC2, AWS RDS

Tools: Docker, Git, Jira, Slack, Figma

KEY CLIENT PROJECTS

- **SUNT (ERP System)**
  Developed a tailored ERP system for Sun Tech, streamlining business operations with automated workflows, real-time data tracking, and integrated reporting.
  Tech: React, Node, Docker, Prisma
- **Generate Genie**
  AI-powered automation platform cutting manual effort by 40%. Features real-time data integration, custom APIs, and an intuitive dashboard.
  Tech: Next.js, Supabase, OpenAI
- **Food Delivery App**
  Cross-platform mobile application with real-time updates for browsing menus, customizing orders, and managing carts.
  Tech: React Native, Redux

AUTOMATIONS

- **Automated Sales Reporting System**
  Built an end-to-end sales reporting automation that pulls data from a warehouse into Airtable, enriches it through external APIs, and delivers reports via Gmail and Discord, with built-in error monitoring to catch and flag failures in real time rather than letting them fail silently.
  Tech: n8n, Airtable, API Integration, Error Handling
- **AI Voice Receptionist & Appointment Booking System**
  Built an end-to-end voice automation connecting Retell AI and Twilio for real-time call handling, with n8n orchestrating the workflow, HubSpot for lead and contact management, and Google Calendar for live availability checks and automatic appointment booking.
  Tech: n8n, Retell AI, Twilio, HubSpot, Google Calendar

PERSONAL PROJECTS

- **Emotion-Aware Chatbot using Fine-Tuned Transformer Models**
  Developed an NLP-based emotion-aware chatbot by fine-tuning a transformer model (BERT/DistilBERT) on the Hugging Face Emotion dataset; performed preprocessing, EDA, and tokenization, trained using the Trainer API, evaluated with metrics.
  Tech: BERT/DistilBERT, Hugging Face
- **CodeDoc Genie**
  Built an AI-powered Code Documentation Assistant using AWS (Lambda, API Gateway, Amazon Bedrock – Titan Text Lite), enabling automated generation of code documentation and inline comments.
  Tech: AWS, Amazon Bedrock, Titan Text Lite
- **BlueJay Event Planner**
  Developed a comprehensive event planning platform featuring both web and mobile applications for seamless event coordination and management.
  Tech: React, React Native, Node.js
- **Hospital Management System**
  A robust desktop application designed for efficient hospital record management, patient tracking, and administrative control.
  Tech: C#, SQL Server, Desktop App
- **Ozbot Robot Navigation**
  Programmed an Ozbot Robot to execute complex collision avoidance algorithms and pathfinding using sensor-based navigation.
  Tech: Robotics, Ozbot, OzoBlockly, Reactive Collision Avoidance, Maze Solving
- **Movie Genre Prediction**
  A machine learning project utilizing NLP techniques to predict movie genres based on textual features and metadata.
  Tech: Python, Machine Learning, NLP

CERTIFICATIONS

n8n Certified Workflow Professional 2025
Full Stack React, Coursera 2022
Advanced SQL & DB, Coursera 2020

ACHIEVEMENTS

Talent Hunt Scholarship, Sukkur IBA 2018 – 2022
IEEE PSYWSC'19 Organizer
Student of the Year Award, APS Shikarpur 2017

SOFT SKILLS

Problem Solver | Team Work | Communication | Leadership | Analytical Thinking
